VOLUME 25

WISI
WHEEL SPECIALISTS, INC.
CUSTOM TAILORED WHEEL & TIRE PACKAGES

For over 25 years WSI has been the industry leader in custom-tailored wheel and tire packages. Our goal has always been to provide the highest quality products and offer the best possible service at a competitive price. We take great pride in serving some of the finest independent tire dealers, automotive dealerships and aftermarket specialty shops all around the country. Our wish is to earn and establish long term working relationships with our customers. We maintain a comprehensive inventory of high quality aftermarket wheels, tires, and accessories from the leading manufacturers in the industry. Whether you are looking to fit an exotic, everyday driver, truck, or SUV, contact us today and one of our very knowledgeable, experienced staff members will be at your service.

RSR
RACE SERIES

RSR forged wheels are produced by applying eight thousand times heavier pressure than casting. This process prevents porosity inside the material and creates homogenous metal structure at the molecular level, helping the material achieve high rigidity and strength. The characteristics obtained by the process allows maximum milling capacity and enables to reduce weight dramatically.

GLOSS BLACK

Nothing sets your car or SUV apart like a new set of distinctive custom wheels from TSW. Make a bold statement by choosing just the right design, finish and size from our collection of light alloy aftermarket wheels. You'll discover that our wheels are as remarkable for their uncompromised quality, precision engineering, advanced materials and revolutionary manufacturing processes as they are for their stunning designs.

It's more than a philosophy. It's more than a carefully scripted mission statement. It is who we are as people. It's what we believe in. It's what motivates us. It's our sense of wrong and right.

VOSSEN

Established with the intent to provide a superior product, today Vossen holds a position as one of the trend-setting brands in the industry. Our passion, much like our commitment to excellence, extends into every facet of what we do. From engineering to design and manufacturing, Vossen is redefining the landscape of modern wheel craftsmanship. With three decades of experience and a distribution network of over 36 countries across the world, our customers have come to expect nothing less than sheer quality and innovation.

CV SERIES MONOBLOCK

Pioneer of the concave, staggered trend, the CV Series employs a low-pressure casting process and delivers classic monoblock designs.

Remington®

You probably know the driver's obsession for finding the off-road wheels that are just the right ones. With Remington wheels, you don't need to look further. If you are ready to take the call of the wild hunter inside you, these rugged wheels will drive you down the least traveled roads. These styles are available for trucks, ATV, golf carts and trailers.

What is Chrome Exchange?

We provide you with a set of chrome plated, original equipment factory alloy wheels and you return the “TAKE-OFF” silver alloy wheels to us. Since it's an exchange, you only pay for the chrome plating! Terms and conditions apply.*

Chrome plating is also available on most Multi-Piece wheels. Please call for details and pricing.

Chroming your O.E. wheels involves a 6 step process:

1. O.E. painted wheel gets stripped down to bare aluminum then polished by hand to fix all the imperfections.
2. The next step will be a nickel plating bath. Nickel bath adds a strong coating that protects against corrosion.
3. Then the Copper plating bath will be done to ensure that the coating provides a deep luster to the wheel and smoothes out all imperfections.
4. The wheel will now be hand polished to generate a deep luster; this procedure is called Copper polishing.
5. Bright nickel plating bath. This step prepares the wheel for chrome.
6. Chrome plating bath.

When purchasing the chrome plating on an Original Equipment wheel from us keep in mind that your original wheels on your vehicle can not have damage. This includes scuffing, scrapes, or bends. If your wheel cores have any damage that need repair, you will be charged for the repair cost. Minor cosmetic damage to the wheel may be taken out during the polishing process. This is to be determined by WSI at the time of core return or we suggest consulting with one of our salesman prior to installing the new wheels to ensure that your wheels are ready for the exchange and don't need any repairs done. Wheels carry a one year limited warranty from the original date of sale. See page 64 for more details.

*Terms and Conditions

Customer understands that when purchasing original equipment wheels and/or accessories for chrome exchange from Wheel Specialists, Inc., the “cores” will be due. Cores need to be returned to Wheel Specialists, Inc. within 15 days of date of sale. Customer will be responsible for replacement costs of cores that are not returned within 30 days of the date of sale. Cores are to be returned at the customer's expense. Wheel Specialists, Inc. is not responsible for shipping charges related to returning cores owed to them. Cores must be the EXACT same part that was given to the customer in chrome, but in the original factory finish. Cores must also be free of any damage or defects. Customer will be responsible for any costs incurred to repair or replace cores returned that aren't in usable condition. Any chrome parts returned as cores are subject to an additional stripping charge, and may be rejected depending on their condition. Wheel Specialists, Inc. cannot be responsible for the condition of customers' parts given to them for chrome plating. It is the customer's responsibility to inspect their parts prior to shipping to determine their condition.

What is PVD Chrome?

PVD is the abbreviation of Physical Vapor Deposition. It is a process carried out in high vacuum at temperatures between 150 and 500 degrees C.

PVD Chrome is the new modern way of Chroming OEM or Aftermarket wheels. Available in three finishes PVD Chrome, PVD Black Chrome, and PVD Midnight Chrome.

PVD Chrome is an OEM tested, approved and patented chrome process that far outlasts other finishes. Unlike traditional chromed or polished aluminum, PVD will not oxidize, fade or discolor, it cleans easily and comes with a five-year limited warranty.

PVD BLACK CHROME

PVD CHROME

PVD MIDNIGHT CHROME

Shown with OEM Lexus center cap

Powdercoating

Powdercoat is a durable finish that is electrostatically applied and then baked to create a smooth finish. We offer powdercoating in a variety of colors in matte and gloss finishes. Powdercoating carries a one-year limited warranty.

SPECIFICATION TERMS

BACKSPACE (OR REAR SPACING): THE DISTANCE FROM THE EXTREME BACK EDGE OF THE RIM TO THE MOUNTING SURFACE.

OFFSET: THE DISTANCE FROM THE CENTERLINE OF THE WHEEL TO THE FACE OF THE MOUNTING SURFACE OF THE WHEEL

PITCH CENTER DIAMETER: BOLT PATTERN

X FACTOR: CALIPER CLEARANCE

TIRE DIAMETER CALCULATOR

IN ORDER TO CALCULATE TIRE DIAMETER, YOU ONLY NEED THE SIZE OF THE TIRE.

$$\frac{\text{CROSS SECTION WIDTH} \times \text{D.ASPECT RATIO} \times 2}{25.4} + \text{WHEEL DIAMETER} = \text{OVERALL TIRE DIAMETER IN INCHES}$$

FOR EXAMPLE:
235/45ZR-17
 CROSS SECTION ASPECT RATIO WHEEL DIAMETER
 (235 x 0.45 x 2 ÷ 25.4) + 17 = 25.327

CROSS SECTIONAL DIAGRAM

PAYMENT TERMS:

All orders will be delivered or shipped on a C.O.D. (cash or verified funds only) basis, unless an application has been approved for company check or open account. Personal checks will be accepted as long as the check writer is present at the time of sale and can provide proper identification, but will be limited to a maximum amount of \$500.00. Debit/Credit card payments will be accepted as long as the Debit/Credit card and Debit/Credit card holder are present at the time of sale, and can provide proper identification. Over the phone Debit/Credit card payments may be accepted under the following guidelines. A) They must be accompanied by a signed Debit/Credit card telephone acceptance form, and B) They will be subject to verification at the sole discretion of Wheel Specialists, Inc. A credit card surcharge of up to 3% may be assessed on applicable transactions. Open account terms will be Net 10th of the month following purchase. If payment is not received by the 20th of the month following purchase, the account will be placed on C.O.D. and a finance charge of 1.5% may be assessed on all invoices that remain unpaid after 30 days. Books will be closed on the last day of each month. All checks returned due to N.S.F. will be assessed a \$25.00 per check service charge. All merchandise will remain the property of Wheel Specialists, Inc. until paid in full.

FREIGHT/SHIPPING & HANDLING CHARGES:

All freight and/or shipping & handling related charges are to be paid by the customer unless prior arrangements are made at the time of sale.

CLAIMS:

Claims for shortage or error must be made within 3 days of receipt of shipment. Claims for merchandise damaged or lost in transit must be made at time of receipt, and documented immediately with the carrier. It will be the shipper's responsibility to file any claims with the carrier. Claims not made or handled within the specified period may not be honored.

RETURN POLICY:

Wheel Specialists, Inc. will gladly accept unused returns within 45 days of the original sale. Unused returns over 45 days will be assessed a 20% restocking fee. Return requests over 180 days will not be accepted. All returns must have prior approval and must be accompanied by a return authorization number. All return shipments must be sent freight prepaid, any freight collect shipments will be refused. It is the customer's responsibility to make sure merchandise being returned to Wheel Specialists, Inc. is packaged properly. Wheels must be bagged and placed in a box that is durable enough to withstand rough handling by freight carriers. Double boxing and the use of foam sheets is highly recommended. Wheels that have been mounted will not be accepted for return under any circumstances. It is the customer's responsibility to fit check wheels before mounting. Wheels that have been custom built, custom machined, or have had custom work (plating, polishing, painting, etc.) done to them are not returnable. Any merchandise "special ordered" by Wheel Specialists, Inc. is not returnable. Closeout and discontinued merchandise are not returnable.

Merchandise installed by Wheel Specialists, Inc. may be returnable depending on its condition. Merchandise must be in "new", "re-saleable" condition, and may not have been used for any period of time. Tires that are worn, wheels that have been dinged, nicked, and/or scraped, etc. do not constitute "new", "re-saleable" merchandise. These type of returns will be handled at the sole discretion of Wheel Specialists, Inc., and may be rejected or subject to miscellaneous labor, repair, and/or restocking fees.

CREDIT/REFUND POLICY:

Once it has been established that a credit will be issued based on our return policy, Wheel Specialists, Inc. will process a credit memo and post it to our books. These credits may only be used by the customer towards future purchases from our company. In the event Wheel Specialists, Inc. originally installed the merchandise, a refund may be eligible, and will be issued in the same form as the original payment, less any miscellaneous labor, repair, and/or restocking fees incurred.

WARRANTY CLAIMS:

Returns for defective merchandise must have prior approval and must be accompanied by a return authorization number. Merchandise must be sent to Wheel Specialists, Inc. freight prepaid. Wheel Specialists, Inc. will send defective merchandise back to the manufacturer for inspection. Credit will be issued to the customer as soon as Wheel Specialists, Inc. receives manufacturer approval. Freight or labor charges incurred may or may not be reimbursed depending on the terms of the manufacturer. Defective merchandise will be repaired or replaced at the sole discretion of the manufacturer. Damage to merchandise caused by shipping, handling, installation, collision, vandalism, use of chains, mechanical defects of a vehicle, racing or willful abuse is not covered under any warranty. Road hazard damage caused by pot holes, road construction, curbs, railroad tracks, uneven road surfaces, nail holes, etc., are not covered under warranty, unless an optional road hazard policy was purchased at the time of sale.

CHROME WHEEL WARRANTY CONDITIONS:

Wheels are under warranty for a period of one year from the original date of sale against defects of materials or workmanship such as peeling, flaking or blistering of plating. This warranty does not cover corrosion or discoloration caused by chemicals, detergents, polishing compound or coarse abrasives used in cleaning. Using these types of products can permanently damage your wheels and will void your warranty. Always run cool water on wheels before cleaning. Failing to cool wheels before cleaning can cause discoloration. Clean wheels frequently with mild soap and warm water. Freight and expenses incurred for labor and mounting or dismounting of tires are not covered by this warranty. This warranty is void if wheels are damaged with nicks from improper tire mounting, improper installation, accident, or curb damage, normal wear and tear, neglect or road impact. Pits and minor imperfections on a newly chromed wheel may be seen on occasion. These are results of the manufacturing process and are not plating defects. This warranty is not transferable.

O.E. CHROME EXCHANGE TERMS AND CONDITIONS:

Customer understands that when purchasing original equipment wheels and/or accessories for chrome exchange from Wheel Specialists, Inc., the "cores" will be due. Cores need to be returned to Wheel Specialists, Inc. within 15 days of the date of sale. Customer will be responsible for replacement costs of cores that are not returned within 30 days of the date of sale. Cores are to be returned at the customer's expense. Wheel Specialists, Inc. is not responsible for shipping charges related to returning cores owed to them. Cores must be the EXACT same part that was given to the customer in chrome, but in the original factory finish. Cores must also be free of any damage or defects. Customer will be responsible for any costs incurred to repair or replace cores returned that aren't in usable condition. Any chrome parts returned as cores are subject to an additional stripping charge, and may be rejected depending on their condition. Wheel Specialists, Inc. cannot be responsible for the condition of customer's parts given to them for chrome plating. It is the customer's responsibility to inspect their parts prior to shipping to determine their condition.

TAKE OFFS/LEFT MERCHANDISE:

Any "take off" merchandise left by customer and not picked up within 10 days after the sale will be disposed of at Wheel Specialists, Inc. discretion. No compensation will be awarded unless customer and Wheel Specialists, Inc. have a prior written agreement. Any merchandise left with Wheel Specialists, Inc. for machining, repair, polishing, plating, etc., must be paid for and picked up within 45 days after the work is done. If merchandise is still "unclaimed" after this time, Wheel Specialists, Inc. will consider the merchandise "abandoned", and have the right to dispose of it, at its discretion, with no refunds or compensation awarded to the customer.

PRICING/AVAILABILITY:

All prices are subject to change without notice. Availability of merchandise is solely subject to the manufacturer. Wheel Specialists, Inc. will not be held responsible for availability issues or problems that are beyond their control.

NOTES:

Wheel Specialists, Inc. recommends that all lug nuts or bolts be retorqued after 25 miles. Maintaining proper air pressure and rotating tires on a regular basis is crucial to tire wear. Wheel Specialists, Inc. recommends that all high performance tires be run and maintained within a +0/-10% psi range relative to the maximum psi listed on the sidewall of the tire. Maintaining air pressure within this range and rotating tires every 6,000 to 8,000 miles will insure maximum tread life of the tire. Vehicles that come equipped with air pressure monitoring systems (TPMS) installed as original equipment from the manufacturer may require that the pressure sensing devices be installed in the aftermarket wheel and tire assemblies in order to keep the system functioning properly. The customer needs to be aware that these pressure sensing devices were designed for the original equipment wheel and tire assemblies and may not be applicable or transferable to aftermarket wheel and tire assemblies. If the pressure sensing devices cannot be transferred or applied to the aftermarket wheel and tire assemblies, and there is not an "aftermarket" option to keep the pressure monitoring system operational, Wheel Specialists, Inc. cannot be responsible if the customer chooses to "bypass" or "disable" the system, and operate the vehicle with a "non-operating" air pressure monitoring system (TPMS). Aftermarket tires, wheels, and accessories sometimes require different hardware and accessories than that originally installed on a vehicle. Examples would include lug nuts, lug bolts, hub centric rings, etc. Aftermarket hardware and accessories provided and/or installed with aftermarket tires, wheels, and accessories are not compatible with original equipment tires, wheels, and accessories originally installed on a vehicle. Wheel Specialists, Inc. strongly advises that proper attention be paid when installing any tire, wheel, or accessory on a vehicle. Not using the proper hardware, checking for obstructions (center bore depth, old hub centric rings, spring clips, etc.), torquing to recommended specifications, and/or installing damaged or wrong merchandise, can all lead to serious damage to a vehicle and/or serious injury or death.

DISCLAIMER:

All of our aftermarket wheels, tires, and accessories are designed and produced to meet or exceed industry standards. These aftermarket parts will likely change the way a vehicle looks, handles, and performs from that of when it was originally equipped from the manufacturer. The customer understands that these changes will vary the vehicles handling, visibility, and braking ability from the manufacturer's original equipment. The customer assumes all risks associated with the driving changes caused by these aftermarket products.

SERVICES AND INFORMATION

COMPLETE MACHINE SHOP SERVICES

- Changing Bolt Patterns
- Changing Offsets
- Center Boring
- Steel Insert Bolt Patterns
- Making Wheels "Hub Centric"
- Custom Centering Rings
- Shaving Back Pads
- Drilling & Tapping Cap Lock Holes
- Multi-Piece Disassembly/Reassembly & Resealing

OTHER SERVICES

- Complete Wheel Finish Restoration
- Repairing Curb Scraped Wheels
- Chrome Plating, PVD Chrome Plating, Gold Plating, Powdercoating, Painting and Polishing of OEM and Aftermarket Wheels
- Offsite Wheel & Tire Package Installations
- Repairing and Resealing 2-Piece and 3-Piece Wheels
- Mounting and Balancing of All Types of Wheels & Tires
- Troubleshooting and Solving of Vibration/Ride Complaint Problems
- Professional Fender Rolling
- Free Daily Valley Wide Pickup & Delivery in the Phoenix Metropolitan Area
- Free Weekly Pickup & Delivery in Tucson Metropolitan Area
- Complete Machine Shop Services Performed in Our Onsite State of the Art Machine Shop
- Same Day Shipping for FEDEX / UPS Orders Received by 3:00 pm
- Great LTL Rates & Delivery Time Frames for Larger Palletized Shipments

INDUSTRY EXPERTISE

- Representatives "Second to none" in the industry in knowledge and expertise
- State of the art facility providing logistics "Second to none"
- Comprehensive inventory of today's hottest styles and fitments from the leading manufacturers in the industry
- Machining procedures to meet exacting standards
- Installation technicians specifically trained to mount, balance and install today's extreme wheel and tire packages
